Art Unit: 1773

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-34, drawn to a laminate, classified in class 428, subclass 457+.
 - II. Claim 35, drawn to a method of making a laminate, classified in class 264, subclass 464.
 - III. Claim 36, drawn to a food packaging method, classified in class 426, subclass 392+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the laminate can be made by solution casting to form the resin layer as opposed to extrusion.
3. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a materially different process such as in forming a structural panel or magnetic recording medium.
4. Inventions II and III are related as process of making and process of using the product. Given that Invention I, the product, has been shown to be distinct from Invention II, the process of making the product, and Invention I, the product, has been shown to be distinct from

Art Unit: 1773

Invention III, the process of using the product, restriction is proper between said method of making and said method of using.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
